

Tire Selection Device

Tire qualification

Product definition

Standard quality tool for tire qualification before use

High complementarity with Roughness Measurement System to qualify both ground and tire

This device allows a fast, easy and simple control of tire tread, and is based on physical criteria (modulus and loss coefficient of the elastomer)

Strengths

Fast: less than 1 minute per tire

Easy: directly on mounted and inflated tire

Simple: operator guidance for basics operations

Handy device

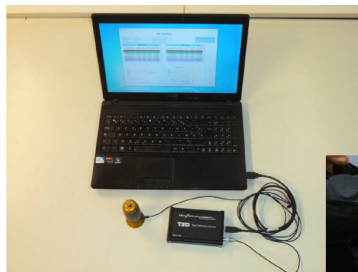

Non destructive test

Basics

Tread compound classification

The tire Selection Device is made of a measurement device and software

The apparatus is easily transportable (traveling case is supplied), simply and rapidly implemented

Our customers

Tire manufacturer, car maker, testing center

Racing teams

The TSD identify out of range tires and select the most homogeneous tires within a set,
key instrument in a quality approach of tire testing
